

Honolulu, Aug. 26 1834. Tuesday. A native belonging to the King's train came to inform me that a cow said to belong to the mission was fastened in his yard"m secured in consequence of having been in mischief. I walked to the place and found one of our young creatures prostrate with her legs tied. The native whose name is Kauliokamoa came pretty soon & I inquired of him what were the damages. He told me 10 dollars. This sum I thought much too great. Indeed I did not think that any thing in justice was due on account of the insufficiency of the fence. This I told him, but said it belonged to us to take care of our cattle & therefore our natives were blameable for not securing her in the yard. I told him that I considered one dollar a sufficient forfeiture for not taking care of the animal, and this sum I was willing to pay. As this sum did not satisfy him I concluded to give him \$5 and in conclusion told him unless he made up his fence I would pay no more damages even if our cattle got in to his enclosure again.

He is now captain of a ship from Newburyport & has been for many years master; but this is the first voyage he has made into the Pacific since he was in the Thames. He stopped at Hilo & brought down the family of Mr. Dibble, whose youngest child is dangerously ill, & landed them at Lahaina.

The families at Lahaina are very much afflicted. Mrs. Richards says in a letter that she with the care of 7 children is the only female of five now at that station which is able to do anything (able to be about); all the rest being confined to sick rooms. Dr. Chapin had been sent for to attend upon the sick child of Mr. Armstrong - He made a visit & returned immediately left the child better.

The Ship *Rasselas*, Cap. Barker arrived this afternoon. By her two letters have come to hand from the Missionary Rooms - one from Mr. Anderson to Mr. Bingham states that in the course of the summer a vessel is expected to sail from Boston which will bring out for the mission a book binder and printer, both married, and two single females one the sister of Mr. Hitchcock & the other a Miss Brown who has been selected to teach domestic manufactures & will bring out a number of looms, wheels &c.

Recd. letters from Maui - Mr. Dibble writes that he had moved up the hill with his family & expects soon to keep house, - thinks it very doubtful whether he shall ever return to Hilo again. His own health is feeble & the climate of Hilo he thinks not favorable either for himself or family. His youngest child is a little better & some hopes are entertained of its recovery.

Mr. Armstrongs youngest child had been dangerously ill but was getting better. He states that something like a mail has been started between the three stations a stout native man has been hired for a fathom of cloth a trip to travel the distance & carry despatches.

Mr. A. had been somewhat ill - his congregation still keeps up its attention - Some he hopes are at least thoughtful if not more: but the mass he says are wild & wild asses & care not much more about the gospel. There is an unaccountable mortality among the people & many keep their dead above ground as do the marquesans at least until they are ordered to bury them. He states that he has a school of 30 teachers

besides a school for children two days in a week & Mrs. A. has a school for women.

The people of Hana he says have gone headlong to the hewa. A company had been to Oahu to seek dala to pay thl)r taxes & came back teeming with iniquity: they commenced drinking rum hula &c. with few exceptions the population went after them. But Hoapili's arrival he thinks will put a stop to it. He remarks - "Verily righteousness grows in shallow ground in this region - A man can be devout to day as a saint & to morrow as drunk as a beast."

She breathed her last on Tuesday morning having been sick only a few days. Her disorder was Croup. Her remains were interred at Lahaina luna the day following. Monday May 25 1834. Mr. Whitney returned from Kaneohe this morning at about 10 o'ck where he went to preach on the Sabbath. He reports the workmen have concluded to take down the walls of Mr. Parker's house and to rebuild them from the foundation.

By a Schooner from Mexico which arrived Saturday evening news has been recd. from the U.S. down to the last of February.

The report which the Schr. brought created considerable of an excitement; but the papers which have come to hand do not confirm the report of the Sch. namely, a war between the United States & France. But it appears that the President recommended the measure to Congress, but the Senate did not approve of it & would not give their consent. It has been supposed that the President wishes to embroil the nation in a war to divert the public mind from the subject of the Post office arrearages, which are said to be to a very great amount - 800,000 dollars and are occasioning much excitement.

Another item of news recd. is that Dr. Wisner died of Scarlet fever in the month of Feb.y.

By a letter from Mr. Lyman we get the information that the princess has been formally excommunicated. This took place on the 24th.

Hoapili we are informed took a very decided stand against certain persons who belong to this island and have been attached to the person of the princess. He sent them on board the Pupuka to take passage for this place. The Pupuka arrived this morning. The crime of these persons was drinking with the Princess last Saturday on board the Griffon Capt. Little.

The Lord's supper was administered a larger number of communicants than ever partook before at this place that I recollect to have witnessed at one time. Many from other islands being at this place.

The Hellespont still remains outside.

Tuesday June 9th. The Hellespont was warped into the harbor this morning. The landing of our goods will commence tomorrow.

Wednesday 10th. The business of landing our supplies is going on at the vessel. Mr. Rogers has been kind enough to volunteer his services to take acct. of the goods as they are landed. I have employed 10 natives to work in getting up the goods. I find full employment at the house in receivg. the supplies as they are hauled up & in storing them.

Monday June 15th 1835. The natives in my employ were required by the Luna hana to stop working unless their pay were doubled. I was obliged therefore to offer the men two yards of cloth per day instead of one, the quantity I had previously given, and with which they had appeared well satisfied.

Tuesday June 23rd. I have now finished drawing up all the supplies from the ship together with a quantity of lumber sometime ago purchased of Mr. French. Our lumber on hand now amounts to upwards of 60,000 feet not including clapboards & lath, - of the former I have two thousand, and of the latter 40,000.

It is not expected that the families of Kona, Hawaii will go in the Velocity. The Missionary Packet now fitting out for the Soc. Islds. to go after the effects of the brethren who went to the Washington islands will employed to carry the remaining families to their stations when she is ready to proceed on her voyage as it will not be much out of her way.

Saturday 4th. American Independence was noticed by the American residents not with noise - no guns being fired but by a dinner to which several of the mission family were invited and the invitation accepted by seven of our number.

I have been employed in sending down supplies for Wailuku & Hilo to go on board the Velocity.

Monday 6th. A very busy day in getting off several of the windward families - The residue of their supplies were sent down and the personal baggage sent on board. At about 6 o'ck the vessel under the command of Capt. Sullivan left the harbour having on board Mr. Clark & family, Mr. Green & family, Mr. Armstrong & family Mr. Coan & wife, Messrs. Andrews, Dibble & Rogers, also Miss Brown & Miss Hitchcock. The destination of the vessel is first to Lahaina, thence to Wailuku and afterward to Hilo. Miss Brown is to be connected with the station at Wailuku and will be more particularly connected with the family of Mr. Armstrong who is located at Wailuku with Mr. Green.

Mr. Coan is designated for Hilo and goes on to be associated with Mr. Lyman. Mr. Goodrich has been invited to come down in the Velocity with his family - not only that his family may be with the physician in a time of expected trial but that he may avail himself of the first suitable opportunity that may offer for leaving for America.

Wednesday July 8th 1835. The Velocity was seen today near the harbor. The wind & current has been

so strong against her that she has made no progress. Mr. Brinsmade went off and boarded her. The families had mostly recovered from their sea sickness.

Thursday July 9th 1835. The Schooner Victoria, Cap. Henry Paty arrived from Valparaiso and brought a quantity of freight for the mission. Honolulu, July 20th - Monday - 1835.

Having made an arrangement with Mr. French for the conveyance of the families of West Hawaii to their stations together with their baggage and supplies and also lumber and supplies for Maui, on board the Brig Lady Wrangell for the sum of three hundred dollars this afternoon at about half past 3 o'ck they set sail to stop first at Lahaina, next at Kawaihae to land Mr. Lyons & his building materials, next to Kailua or Kaawaloa.

The families left our houses at 10 o'ck expecting the vessel would immediately sail; but for certain reasons she did not get off till past 3 o'ck.

July 21. Quarterly Examination of schools of Honolulu.

Wednesday 22. This is the regular time for the examination of the schools of Waikiki but it has been deferred till next Wednesday in order that the people may avail themselves of the privilege of taking fish in the waters between this place and Ewa. The common people I have been informed are allowed by custom to assemble at certain times to take fish freely - This is a privilege of which all wish to avail themselves; I do not know of how long a standing the custom is; but certainly from Kamehameha's time as I learn that he used to go with others on such occasions to fish.

Honolulu, July 27th 1835. Monday. Dr. Judd received a letter from Mr. Smith yesterday informing his of a very surprising case of a man who being engaged in fishing had been pierced dangerously by a sword fish.

The animal darted at him as he stood by his canoe about to set his net and thrust his bill into his neck which passing under his collar bone entered his windpipe & cut it off. It is said this fish has been known before to spring out of water & jeopard those that are in its way. I have not however heard it mentioned that any person was ever before killed in this way - Dr. Judd on his way to Ewa in a canoe recently was cautioned to be aware of this animal.

Tuesday 28th. Mr. Smith arrived from Ewa and has given some more particulars concerning the man who was wounded by the fish and who died in about 10 hours after he was hurt. He and some others had been employed on Saturday by Mr. Smith to work for him - At evening the man proposed to some of his neighbors to go a fishing and they consented. Having got ready they proceeded to the place where they were to fish. Here they waited some time for the appearance of the fish - when they began to jump they went out - Looking into the water which was shallow one said Here is a large fish let us get out & spread the net. The man before mentioned said I am afraid of the fish - knowing it was a sword fish - he however got out - but almost immediately the fish made a pass with his long bill and pierced him in the manner stated. He cried out Ua ku i ka ia - and dropped all - his companions took him up and set out to return. They sent a messenger to Mr. Smith to apprise him of the condition of the man. It was with some difficulty they got him home. When Mr. Smith got to him he found him in a sad state - he sowed up the wound in order to secure the wind pipe - and attempted to bleed him but not with success. He despatched a messenger to this place to inform Dr. Judd. All effort however to relieve the man proved vain. His neck began to swell and the fleshy parts to distend and this continued filling him with great distress, until he died.

Mr. Smith has been selecting lumber for his station both for the finishing of his own house and for doors, windows &c. for the meeting house about to be erected at that station.

Wednesday July 29 1835. Went to Waikiki to examine schools. Those who came out to this examination amounted to 1,030. The increase is owing it is said to the exertion of the teachers - the members of the church of this station, who about the time of the meetings during our sessions here went out to stir up the people to attend to schools & to attend to religion.

It is not known that the chiefs made any exertions to get the people back any farther than by the publishing & executing of their laws. I understood however that drinking persons are liable to be punished.

Friday July 31st 1835. The Lady Wrangell & Velocity were both in sight early this morning the former having been employed to carry the families of West Hawaii to their stations the latter to carry families to

Maui & Hilo. The Velocity left this port on the 6th and the Lady Wrangell on the 20th.

Saturday August 22 1835. The Schooner Minerva arrived from Kauai and brought letters from the brethren. The last dates were the 13th inst. Mrs. Whitney was very sick and her life thought to be in danger. Medical assistance seemed to be very much needed. Mr. Alexander, who was at Waimea with his family, thought that a physician should be sent with delay at the expense of chartering a vessel.

We have made up our minds to send a vessel. I called upon Cap. Grimes having heard that he was about sendg. his Schr. Flibberty Jibbet to Kauai hoping by offering him a compensation to prevail upon him to send her off immediately and to send in her a physician. I found he was not going to send her on his own account; but would let her go on our account we paying him \$10 pr. day. Hoping to obtain the Paalua at a lower price and to get her away sooner than the Flibberty Jibbett, Dr. Judd rode down to Moanalua where Kinau is now staying to see her upon the subject. Dr. J. consulted her, but found he could not obtain the vessel. Whereupon we decided to employ the Flibberty J. and to get her off to morrow and to send down Dr. Thomas who is willing to go -

Wednesday Augt. 26 1835. The Griffon, Cap. Little sailed for Hawaii and was accompanied by his lady - the former Miss Wood to whom he was married last week Wednesday. We sent several bundles by him.

The Pupuka sailed also for Lahaina but was in danger of sinking and turned back.

The Velocity arrived this morning from Kawaihae. Brought letters from Waimea and Hilo.

Was abused this afternoon in the store of Ladd & Co. by the English Consul. The cause of the abuse was an article in the Herald for the year 1831 containing an account of the return of the Becket. The paragraph as follows; "The natives who survived speak of the conduct of some of the foreigners towards the sufferers as barbarous in the extreme, but they endeavor to justify themselves." This the Consul says is a villanous falsehood and known to be so by the writer.

Sabbath Augt. 30 1835. A service was conducted at noon at the house of the King. The proposition of the meeting was made at the instance of Kinau, who had recently come up from Moanalua, to attend upon the king in consequence of indisposition.

Mr. Reynolds has requested us to bring the Nautical almanac for the year 1836. The printing com. met and decided to print it.

Tuesday Sept. 15th 1835. A man by the name of Palmer has been killed today, at a house somewhere in the rear of Honolulu.

The circumstance as related are these. The Second mate of the Brig Diana wished to flog one of the sailors connected with that vessel and for this purpose employed the two Lewis boys, as they are called, sons of a foreigner by a native woman, to have a row, & fight him. This was affected but how it was brought about I did not learn. The man it seems flogged both of them - probably one at a time: - after which both of them fell upon him at once. Palmer interfered. - At this one of the Lewis boys wished to know why he interfered - that it was no business of his - Palmer said he had a right to interpose when two men were upon one. The Lewis boy then aimed a blow at his side which felled Palmer - and after he had fallen struck him another blow under the ear. P. never moved or breathed after the first blow. The sailor who was the occasion of the quarrel is said to be the same man who was on board the Ship Stonnington several years ago & who while lying at anchor in the roadstead killed a ship mate by a blow with a knife. He was then tried but the circumstances were such that nothing could be done with him here. He left, I believe, the vessel at that time.

Palmer was a resident of this place who has a family & has been here a considerable number of years.

Wednesday Sept. 16 1835. The Hooikaika sailed for Lahaina and is to proceed thence to Hilo. I sent some things for both places.

Monday Sept. 21st. Last night the Missionary Packet came to anchor in the roads. This morning she came into the harbor and we recd. letters from Mr. Baldwin. The Packet made her passage from here to Tahiti in 31 days staid at that island 11 days - went to Huahine lay off and on there 1 1/2 days and made her passage thence to this port in 22 days. She was absent 58 days in all.

On Saturday night the Pt. anchored in Lahaina roads, and landed Mr. Baldwin & effects and got away again same night.

The man slayer had his trial to day. I understand that the jury was composed of twelve foreigners & twelve natives - or rather of two juries of equal numbers. Both, after hearing the witnesses, agreed in the verdict of Man Slaughter; which crime is by law punishable by four years imprisonment, but may be commuted by paying two hundred dollars in money.

A party at the house of Cap. Little:- a Wedding party, to which were invited all the missionaries at this station; & it was attended by all that were in health; two only not being able to go. Every thing in fine style of fashion and it was a very pleasant party as the world would call it. Of course there was no religion connected with it. The mission families took leave about 10 o'ck.

They are accommodated at the house of Mr. Tinker.

Tuesday Sept. 29th 1835. Mr. Spaulding & family took passage with Hoapiliwahine on board the Paalua for Lahaina. The health of Mrs. S. is a little more comfortable than when she came down; but she is still very feeble. She was carried down by natives in a settee & in this manner put into the boat which took her on board the vessel.

Friday October 16, 1835. This day Mr. Bingham & family set out for Kaneohe. Took Warren Fay with them as far as the place where Dr. Judd & family are at present residing at Nuuanu.
