

Mr. Wilcox.
Maiohi.
Kauai,

Honolulu,

Apr. 2, 1850.

Dear Bro: Wilson;

I wish, as in former years, to procure some statistics of your school for 1850. Will you do me the favor to answer the following inquiries?

What was the average number of scholars in the year 1850?

Were they all pure natives?

How many teachers & what was their names?

What were the studies of the school?

What was the total cost of the school in 1850?

By whom is it supported?

How much time was devoted to manual labor, & what were the avails?

What was the general conduct of the scholars?

Is the school popular on Kauai?

What is the state of the school building? Are they permanent buildings?

What are the prospective wants of the school?

What amount of land is connected with
the school? Is it available for support?

Add any other items you may think proper.
Please let me have your replies to these
questions as soon as possible, and with
them before making out my report
to the Legislature, which is to meet
on the 30th of this month.

We are all well. The French
Corvette is off, & our heads are all on
our shoulders still. How often has God
put a hook in the nose of that sin-
-gular people, & turned them back?

Kind regards to your children

Truly yours
R. Smithson.
